The purpose and procedure section in each issue of *Evidence-Based Medicine* describes the criteria for selecting articles for inclusion. The journals read are also listed in each issue. All articles that meet our criteria in the reviewed journals are cited in *Evidence-Based Medicine*, but there is not enough space to abstract them all. The following articles passed all criteria but were not abstracted. Practising clinicians rated them for clinical relevance and newsworthiness, and the mean scores are displayed. A fuller list of articles and a sample of the rating form are available on the *Evidence-Based Medicine* website (www.evidence-basedmedicine/cgi/content/full/11/2/e1).
